Education

Milestone	Affiliation	Year	Summary
Grade 10	CBSE	2011	Secured a 9.6 CGPA
Grade 12	CBSE	2014	Secured 95.4 %
B.Tech(CSE)	IIIT-Delhi	2014-Present	Current CGPA 7.26

NOTE: A three year gap between classes 10 and 12. An extra year to make up for mistakes.

Projects

Project	Language/Technology	Status	Summary
Simple Linux Shell	C	Complete but great scope for improvement	Wrote a simple shell in C, which can parse the input and execute it. Functionality for I/O redirection and Pipelining. See repository.
Likes Predictor for Facebook	JAVA, Eclipse, REST FB API, JAVA Servlets	Complete and working. Could do with some machine learning and a better predicting algorithm.	A simple Facebook App that predicts the number of likes that your future posts may get based on your previous posts. See Repository
Basic File System	C	Complete. Scope for improvement.	A very simple file system implementation. Keeps track of file in different files using Inodes and Data-Nodes. See Repository
Ph.D Admission System	JAVA, Eclipse, FXML, SceneBuilder	Complete and working. Modes of payment can be implemented	A admission system for colleges where interested Ph.Dcandidates can fill their applications which are stored. The admin can filter the applicants based on their information. See Repository
ZedStead - A Math Game	JAVA, Eclipse, Android	Complete. Scope for improvement. Better version on the way.	An easy to play Android math game. Objective of the game is to arrive at the given number using the provided operations. See Repository
My own blog	Ruby, Ruby On Rails, Material Design Lite, Javascript, CSS/SASS, Rubymine	Completed. Yet to be deployed.	The project about which I am most passionate. Love the framework. This will help me to get my views and thoughts out there in the void. See Repository

Other public projects (and the ones above) can be found on **Bitbucket** and **Github**.

Skills

★ = Beginner / Started learning and interested
 ★★ = Intermediate / Can Find My Way Around
 ★★★ = Proficient / Fast, well versed and efficient.
 ★★★★★ = Expert / Zen Master. Ask me anything !

Skill	Level
JAVA	★★★
C/C++	★★★
Ruby/Rails	★★★
GIT/Version Control	★★★
Linux	★★★
Android Developoment	★★
Python	★★
L ^A T _E X	★★
JavaScript	★★
HTML/CSS	★★

Hobbies

• Reading

I gobble books. There is nothing I like better than reading different kinds of books. I make it a point to read atleast 8 books a semester and usually end up reading more than that.

• Writing

I try to write stuff that crosses my mind and try to ink the way I feel about the world on paper. I keep a journal, and about to deploy my blog soon. That'd be awesome.

• Sports

I play basketball and football. I am in the college basketball team. I follow most of the happenings in the worlds of these sports. I want Liverpool to win the EPL soon.

• Travelling

To travel and find God, is one of my life's goal. I go camping once a semester, during the mid-semester break. This semester I went camping in Brahmatatal. Great Trek, although it did get a bit cold during the nights. Loved the feeling of cooking dinner on fire after a day of hard walking and taking in beatiful sights.

• Writing Fun Scripts

Sometimes when need demands or when I find time, I try to tinker around in my Linux Mint, and see if I can make it more productive. I wrote a **Ruby** script that gets the 'Word of the Day' from Dictionary.com and displays it everytime I open the terminal during that day. Good Stuff. [See Script](#).

Miscellaneous

- This CV was typeset in L^AT_EX. [See Repository](#).
- Linux is my primary operating system. Both my laptop and desktop use only Linux OSes. No other OS installed.
- [Synecdoche, New York](#) is one of the greatest movies *EVER*.

Thank You for looking at my CV.
